101ST CONGRESS *1st Session* | SENATE | REPORT 101-130

MILITARY CONSTRUCTION APPROPRIATION BILL, 1990

SEPTEMBER 14 (legislative day, SEPTEMBER 6), 1989.—Ordered to be printed

Mr. SASSER, from the Committee on Appropriations, submitted the following

REPORT

[To accompany H.R. 3012]

The Committee on Appropriations, to which was referred the bill (H.R. 3012) making appropriations for military construction for the Department of Defense for the fiscal year ending September 30, 1990, and for other purposes, reports the same to the Senate with various amendments, and presents herewith information relative to the changes made:

Amount of bill passed by House	$8,698,000,000
Amount of Senate bill under the House	990,907,000
Total of bill as reported to Senate	7,707,093,000
Amount of 1990 budget estimate	8,554,900,000
Amount of 1989 appropriations (adjusted)	8,960,700,000
The bill as reported to the Senate:	
Under the budget estimate, 1990	847,807,000
Under appropriations for fiscal year 1989	1,253,607,000

21-639

BACKGROUND

Purpose of the Bill

The Military Construction appropriation bill provides necessary funding for the planning, design, construction, alteration, and improvement of military facilities worldwide, both for Active and Reserve Forces. It also finances the construction, alteration, improvement, operation and maintenance of all military family housing, including payments against past housing mortgage indebtedness. Certain types of community impact assistance are provided, as well as assistance to members of the military who face loss on the sale of private residences due to installation realignments. The bill is also the source for the U.S. share of NATO infrastructure construction costs.

Comparative Statement

The fiscal year 1990 budget requests appropriations totaling $8,554,900,000, including $500,000,000 for the "Base closure" account which will be funded in the Defense appropriation bill. The following table displays this request and compares it with the current fiscal year, the House amount, and the Committee recommendation:

SUMMARY OF THE BILL

The Committee recommends a total of $7,707,093,000 in new budget authority/appropriations for fiscal year 1990 programs under its jurisdiction. Significant comparisons are noted below:

Fiscal year 1990 budget request: Budget authority	$8,554,900,000
Committee recommendation for fiscal year 1990: Budget authority	7,707,093,000
Which is—	
Under new budget authority granted in fiscal year 1989 by	1,253,607,000
Under the budget request by	847,807,000
Under the House bill by	990,907,000

COMPLIANCE WITH SECTION 308 OF THE BUDGET CONTROL ACT

Section 308(a) of the Budget and Impoundment Control Act of 1974 (Public Law 93–344) requires that the Committee include in its report a comparison of its recommendations with levels contained in the first concurrent resolution. Appropriate data are reflected below:

BUDGETARY IMPACT OF BILL

PREPARED BY THE CONGRESSIONAL BUDGET OFFICE PURSUANT TO SEC. 308(a), PUBLIC LAW 93–344, AS AMENDED

[In millions of dollars]

	Budget authority		Outlays	
	Committee allocation	Amount of bill	Committee allocation	Amount of bill
Comparison of amounts in the bill with the Committee allocation to its subcommittees of amounts in the First Concurrent Resolution for 1990: Subcommittee on Military Construction	7,709	7,707	8,463	[1] 8,344
Projections of outlays associated with budget authority recommended in the bill:				
1990				[2] 2,869
1991				2,734
1992				1,283
1993				467
1994 and future year				354
Financial assistance to State and local governments for 1990 in the bill		116		14
	Direct loans		Loan guarantees	
Credit authority estimates, fiscal year 1990				

[1] Includes outlays from prior-year budget authority.
[2] Excludes outlays from prior-year budget authority.

COMMITTEE RECOMMENDATION

As previously noted, the Committee is recommending new fiscal year 1990 appropriations of $7,707,093,000. This is $847,807,000 under the budget request, $990,907,000 under House allowances, and $1,253,607,000 under appropriations for fiscal year 1989. The basis for this recommendation is contained in the following "Items of special interest," and under the discussions pertaining to each individual appropriation. Complete project detail is provided in the tables at the end of the report.

ITEMS OF SPECIAL INTEREST

CONFORMANCE WITH AUTHORIZATION BILL

The Committee strongly supports the authorization-appropriation process. The Committee regrets the necessity of reporting the fiscal year 1990 appropriation bill prior to completion of the authorization conference. However, the bill as reported by the Committee does not include funds for projects were not authorized by the Senate-passed Defense authorization bill. The Committee has provided an additional amount for Guard and Reserve minor construction and planning and design and a deficiency allowance to the Guard and Reserve accounts to permit the conferees sufficient flexibility to reconcile specific project differences. In addition, the Committee has funded certain research and development-related construction activities authorized in the Senate-passed Defense authorization bill and has provided an additional amount for Army family housing improvements.

BASIS FOR COMMITTEE RECOMMENDATION

During the past decade the Congress has provided almost $70,000,000,000 for military construction and family housing operations. The military construction appropriation has grown 77 percent in real terms (adjusted for inflation), a rate of growth almost twice the rate of increase for the Department of Defense as a whole.

The Committee continues to support adequate levels of funding for military construction. However, because of the need to reduce the Federal deficit and the lack of stronger support by Department of Defense leadership for increased levels of military construction investment, the Committee is recommending a substantial reduction from the level of the fiscal year 1989 appropriation. The Committee will support real increases for military construction once the Federal budget deficit is brought more under control, and the Department's leadership demonstrates stronger support for needed new infrastructure investments.

The Committee has provided for the Nation's highest priority military construction requirements by rearranging the priorities in the budget. As in previous years, the Committee has made substantial reductions in overseas spending while increasing investments for the cost-effective Guard and Reserve component.

MORE EQUITY IN PROGRAM

The Committee is concerned that the Department is submitting military construction budgets which reflect substantially different approaches and philosophies among the military departments and agencies. The Air Force continues to request substantially more re-

sources for installation enhancements than do the other services. The Committee is concerned that if the Air Force more rapidly improves its base infrastructure, the other services will be perceived by young men and women considering military careers to be less concerned with living and working conditions than the Air Force. The Committee strongly rejects a dual standard which permits the Air Force to more rapidly modernize its base infrastructure while the other services budgets appear to lag behind.

The Committee commends the Army and the Navy for making efficient use of scarce military construction funds. In the view of the Committee, the approach of the Army and the Navy seems more in line with the need to moderate overall spending during times of budgetary stringency. The basic approach of the Air Force will be more appropriate as the budget deficit diminishes.

The leadership of the Department is directed to work with each of the services to ensure that future budget submissions provide a more fair and equitable distribution of scarce military construction and family housing resources.

GUARD AND RESERVE

The Committee continues to support increased funding for the Guard and Reserve. The Committee believes the Guard and Reserve component represents the "biggest bang for the defense buck." Therefore, the Committee has increased funding for Guard and Reserve accounts by $265,310,000.

Budgetary realities dictate a rethinking of the Nation's current force structure mix. The Nation can no longer afford to maintain the existing Active Force structure without substantially reducing readiness. The Nation's security must never again be left to hollow and poorly trained forces.

The Committee believes the Guard and Reserve has an important role to play in the reorientation of the Nation's military force structure. As budgetary realities dictate Active Force structure reductions, more resources should be placed in the Guard and Reserve. Under continued budget stringency, the Department should move toward a Total Force that more heavily relies on Guard and Reserve units.

Many of the reductions made by the Committee reflect the view that large military construction investments for the Active Forces should not be made until a more realistic Total Force mix is achieved by the Department of Defense.

The Department is directed to provide the Committee with a report by February 15, 1990, outlining a specific 5-year plan for increasing missions and budgetary resources for the Guard and Reserve.

BURDEN SHARING

Over the years modest progress has been made on the issue of burden sharing by our allies. U.S. budgetary realities, however, now demand that more dramatic progress be achieved.

For several years, the Committee has urged the executive branch to make burden sharing a higher priority topic in our diplomatic relations with allied countries. The Committee has supported those

efforts that have been undertaken by the Department to date. The Committee also notes that some progress is being made with specific countries and recognizes NATO's partial contribution to the relocation of the 401st Tactical Fighter Wing and the increased amounts of construction being performed for United States forces in Japan. The Committee believes, however, that the administration must adopt a more aggressive approach across the board to the burden sharing issue.

The Committee has made a number of reductions to the request for overseas construction to underscore the need to secure additional support from allied countries.

Renegotiate agreements.—The Committee believes the Department of Defense should urge the Department of State to renegotiate existing status of forces agreements [SOFA's] with a number of countries. In the past, the Department has been reluctant to reopen SOFA's to negotiation. The Committee believes the Department should reconsider its opposition and seek to renegotiate more favorable terms especially with Germany, the United Kingdom, Japan, and Korea. The Department is directed to provide the Committee with a report by January 15, 1990, on a plan to renegotiate these and other SOFA's. The plan should include specific proposals for increasing host nation contributions to U.S. forces and dependents deployed abroad. Among the proposals to be considered should be host nation financing of construction, maintenance and operations of military family housing, community facilities, hospitals and dependent schools.

Arms control.—The Committee is encouraged with the potential for negotiating a conventional arms control agreement which will reduce the threat of an offensive attack by the Warsaw Pact in Europe. The Committee believes that conventional arms reductions present an opportunity to reduce the number of U.S. forces deployed abroad. The Committee again reiterates the view that, once NATO force levels are reduced by negotiation, the United States, among the NATO allies, should be permitted to withdraw the largest numbers of forces from the European theater. Making Western Europe more responsible for its own defense should be a United States goal of the conventional arms control process.

Construction reduction.—The Committee has denied funding for many projects requested for Germany, the United Kingdom, Japan, and Korea to underscore the Committee's concern with the burden sharing issue. The Committee opposes most new military construction investments in these countries until host nations begin to provide more financial support to U.S. forces deployed abroad. The Committee has provided funds only for certain projects necessary to satisfy immediate safety and security concerns and to provide limited support for certain ongoing modernization efforts.

NATO infrastructure.—The Committee strongly supports the NATO infrastructure program as the only pure burden sharing program in the military construction bill. The Committee continues to believe that NATO should expand the criteria for the infrastructure program. The Committee has denied funding for a number of specific service projects in Europe which could be funded by NATO if existing criteria were expanded.

The Committee notes that the Department of the Navy has undertaken an initiative to secure infrastructure funding for qualified projects at U.S. bases. The Committee commends the Navy for pursuing this initiative and directs the Army and the Air Force to undertake a similar initiative. The Army and the Air Force are directed to report to the Committee by February 1, 1990, what specific efforts are being undertaken to secure NATO infrastructure funding to support construction inside the United States. In particular, the Committee believes that Army and Air Force embarkation locations are eligible for NATO infrastructure funding.

401st Tactical Fighter Wing.—The Committee recognizes that the North Atlantic Treaty Organization views the relocation of the 401st Tactical Fighter Wing from Torrejon, Spain, to Crotone, Italy, to be an example of effective burden sharing by the allies. The Committee appreciates the efforts undertaken by NATO to partially support the wing's relocation after Spain required it's removal from Torrejon. However, the Committee believes that the Department and the Air Force's execution of the relocation of Torrejon missions could be improved. The Committee has deleted funds prematurely requested by the Air Force for construction of a range and community support facilities at Crotone. Although the Committee has placed no restriction on utilizing prior year funds for design of the most critical facilities, the Air Force should not request appropriated funds for construction of these projects until the Government of Italy has fully concurred with construction. Furthermore, the U.S. mission to NATO should ensure that NATO infrastructure funds are utilized to the maximum extent possible to fund necessary facilities.

The Committee further directs that no funds from Air Force operations and maintenance, planning and design or military construction may be utilized to support the relocation of 16th Air Force headquarters from Spain to another country. The Committee believes the Air Force should request the Department of State to seek additional discussions with Spain to secure financial support for any remaining relocation or construction costs not fully supported by NATO, including that associated with 16th Air Force headquarters.

The Committee further denies the request to utilize $181,000,000 from the U.S. contribution to the NATO infrastructure fund to reimburse NATO in future years for construction of family housing units at Crotone. The Committee, however, does not object to the construction of housing utilizing NATO's infrastructure funds. The housing should be constructed to U.S. standards and made available by NATO for individual service members to rent at a rate not in excess of the individuals' housing allowances. Such an arrangement is consistent with the agreement originally negotiated by former Secretary of Defense Carlucci. When the cumulative rental payments from housing allowances equate to the actual NATO infrastructure investment, no further payments shall be made. Thereafter, the housing shall remain available for the Air Force's use at no further cost.

Base rights.—The Committee remains concerned with the failure of many allied governments to provide U.S. military forces appropriate base rights and base access. Spain is forcing the United

States to remove the 401st Tactical Fighter Wing from Torrejon at great cost to the United States and the NATO Alliance. The future of United States facilities in Greece is in question. Long-term base rights in the Philippines after 1991 has not been assured by the Aquino government. Countries in the Middle East-Persian Gulf region place restrictions on U.S. access.

The Committee reiterates the view that base rights and base access is a tangible measure of burden sharing. U.S. forces deployed abroad defend allied security as well as U.S. security. The Committee believes the administration has been derelict in making this point clear during negotiations with allied governments.

The United States should not maintain military bases in countries where we are not welcome. Nor should the Department of Defense urge the administration to accept unrealistic foreign aid and other financial demands from foreign governments which seek to gain leverage in exchange for a U.S. military presence on their soil.

Cruise missile bases.—The Committee remains concerned that the Department has not developed a plan and identified future uses for each of the cruise missile bases being vacated under the terms of the INF Treaty. The United States and NATO have invested hundreds of millions of dollars in these facilities. Until a long-term use for each of these bases is validated, the Committee will be inclined to reduce U.S. unilateral construction in countries where GLCM bases are located. The Committee also takes the view that these bases should be available to any military service, not just the Air Force.

BASE CLOSURES

The House-passed military construction bill provides $500,000,000 as requested in the budget to capitalize the "Base closure" account. The Senate Subcommittee on Defense has jurisdiction over base closures in the "Operations and maintenance" account. Therefore, the Committee has eliminated funds for base closures in the Senate version of the military construction bill.

ALTERNATIVE FINANCING

The Committee has not opposed various alternative financing methods recommended for test by the Department of Defense. The Committee believes that third-party financing contracts should be considered on a case-by-case basis whenever such contracts can be documented to be more cost effective than the regular military construction process. However, the Committee believes that the Department is planning to undertake as much as $1,000,000,000 in third-party construction projects excluding family housing. Construction of such magnitude must be subjected to appropriate oversight. The Committee directs the Office of the Secretary of Defense to develop a plan to exercise oversight on all third-party contracts entered into by the services and agencies. The process should be similar to the process for approval and oversight of section 801 housing projects.

The Committee is also concerned that appropriate congressional oversight be exercised on annual expenditures supporting alternative financing arrangements. Therefore, the Committee directs the

Department to submit legislation to provide that any annual payment to support a lease or any other alternative or third-party construction project, including housing or regular military construction, be funded through a new "Debt payment" account in the military construction appropriation bill. Currently, such annual payments are folded into the large operations and maintenance accounts in the defense appropriation bill. The Committee further directs that a new alternative or third-party military construction or family housing project may not be initiated until it has been included in the annual budget request, including the provision of justification form 1391, and specifically approved in an annual Military Construction appropriation bill. Any out-of-cycle project desired by the Department must be submitted to the appropriate committees as a reprogramming request for approval prior to project initiation. The Committee believes the magnitude of alternative financing the Department desires to undertake must be specified in the budget and justified in separate accounts under the jurisdiction of the Military Construction Subcommittee.

FINANCIAL FLEXIBILITY

The Committee is concerned that consideration is being given by the Department and services to specific proposals aimed at increasing financial flexibility which, in reality, would result in a reduction of congressional oversight of the "Military construction" and "Family housing" accounts. The Committee supports appropriate steps toward reducing the amount of time and redtape necessary to accomplish a military construction project. However, the Committee is strongly opposed to the development of unified budgets which would permit base commanders to utilize a single pot of funds to provide for military construction, maintenance and repair, minor construction, and operations and maintenance. Such a practice would substantially increase the potential for fraud and abuse. The military construction bill, alone, provides almost $8,000,000,000 annually. U.S. Treasury expenditures of that magnitude cannot be made without appropriate oversight by the Congress and the Department of Defense. The Committee will strongly oppose efforts to impose financial flexibility at the expense of appropriate oversight over specific construction projects and activities. The Committee also opposes merging the family housing operations accounts and the military construction minor construction accounts into the services and agencies operations and maintenance accounts. The Committee has not objected to an increase in the operations and maintenance construction threshold from $200,000 to $300,000. Such a 50-percent increase should provide base commanders with substantial new flexibility.

The Committee also agrees with House report language regarding the Model Installation Program [MIP]. The House surveys and investigative staff is commended for its report revealing that MIP has not resulted in cost savings and for detailing abuses that could occur in the program.

FUTURE AIR FORCE CONSTRUCTION

According to press reports, an internal Department of Defense study has found that 36 of 64 major Air Force bases are less than half utilized. The study, which has not been publicly released, reportedly concludes that there is a large potential for consolidating the active Air Force on fewer bases. The Committee believes the details of this report should be made available to the Congress and the public and directs that the study, completed last December, be released immediately following enactment of this bill.

If the report's conclusions are correct, the pace of future Air Force military construction activities must be carefully reviewed and reevaluated. The Committee believes that Air Force base consolidations could result in a substantial reduction in currently programmed construction activities.

OTHER DOD CONSTRUCTION

The military construction bill provides less than one-half of the total construction-related activities of the Department of Defense. The Committee calculates that, in addition to the $3,271,000,000 requested for military construction by the Army, Navy, and Air Force, these three uniformed services are seeking to spend more than $3,825,000 for construction activities in the "Operations and maintenance," "Procurement," and "Research and development" accounts funded in the Defense appropriation bill. Construction activities in these accounts are not normally identified on a line item basis as are regular military construction projects. Therefore, construction activities other than military construction do not receive the same degree of oversight from the Department or the Congress.

The Committee is concerned that the Department may not be adequately monitoring the entire range of construction activities to ensure appropriate oversight and the utilization of proper funding accounts. For instance, the Committee has learned that the Air Force is planning to fund certain large military construction projects programmed in future years in the research and development accounts. The Committee strongly objects to such proposals. (A discussion of this proposal is included in the report under "Military Construction, Air Force—Other changes—National Asset Initiative.")

The Committee has also denied funding for one project requested by the Strategic Defense Initiative Organization under military construction which the Committee believes should be funded utilizing research and development funds. The Committee has also added $23,000,000 for SDIO to complete construction of the national test bed in Colorado. Funds from R&D should not be used to complete this project which has previously been funded entirely by the military construction appropriation.

For the second year, the Committee has provided appropriations in the military construction bill for the conduct of specific research and development-related construction by the three active services.

The Committee also requests the General Accounting Office to conduct a complete review of the Department's construction activities other than military construction. The GAO report should make specific proposals for improving oversight and for ensuring that the

proper appropriations accounts are being utilized by the Department.

BIENNIAL BUDGETING

The Department requested appropriations for 2 fiscal years, 1990 and 1991. The Committee has not considered projects requested for fiscal year 1991 because the budget estimates are unreliable since the projects requested are not designed. The Committee will review the request for fiscal year 1991 next year when the Department provides the Congress with a revised request which includes more accurate estimates of project scope and cost.

OTHER ISSUES

Central America construction.—The Committee has denied funding for two projects in Honduras totaling $15,400,000. The Committee believes these projects are not necessary to support current and planned U.S. military exercise requirements and are, therefore, essentially security assistance to the host country. Security assistance appropriations are under the jurisdiction of the Foreign Operations Subcommittee. The Committee has also denied funding for projects in Panama. The Committee believes investments in that country are unwise due to the current political climate and the requirement that United States military installations be turned over to the Government of Panama by the year 2000. The Committee directs the Department to submit a 5-year construction plan for the Caribbean Basin by March 1, 1990. The report should also include a discussion of the options being considered for the relocation of the Southern Command from Panama.

Philippines.—The Committee has denied funding for projects requested in the Philippines. The Committee continues to be concerned with the pace of negotiations on the U.S. military presence after 1991. The Committee believes that, until these negotiations are concluded, no new significant military construction investment should be undertaken in the Philippines. Should negotiations fail, substantial sums will be necessary to relocate Navy and Air Force missions to other Pacific locations.

Korea.—The Committee continues the general provision which prevents an increase in accompanied tours in Korea. In addition, the Committee agrees with the general provision added by the House which prevents the use of appropriated funds to support the relocation of the U.S. 8th Army headquarters. The Committee insists that all relocation costs must be the responsibility of the Government of South Korea.

Construction in Zaire.—The Department is directed to provide to the Committee by January 30, 1990, a report on specific construction and engineering activities in Zaire to be funded from any Department source during fiscal year 1990. In addition, the Department is directed to prepare, in coordination with the Department of State, a detailed plan of construction activities proposed for Zaire in the next 5 years. The plan should be submitted to the Committee along with the report on fiscal year 1990 construction and engineering activities and should follow the format currently utilized in the annual Central America report. In addition, the

Committee directs that no additional construction expenditures be made in Zaire until the report has been prepared and submitted to the Congress and reviewed by the Committees. The Committee commends the General Accounting Office for its report on this activity.

Pentagon rehabilitation.—The Committee has deleted funds to initiate design of a $600,000,000 project to rehabilitate the Pentagon complex. The Committee is not unmindful of the age and the deterioration of the Pentagon Building. However, for a number of years the leadership of the Department has failed to recoup a fair share of funds for repair and maintenance from the annual rent payments made to the General Services Administration. The Department should not now be seeking funds of this magnitude from the military construction appropriation during a period of severe budget stringency when higher priority projects in the military services remain unfunded. Furthermore, the Committee reiterates the view that space needs at the Pentagon should be fulfilled by relocating functions and missions to other States and localities.

Reporting requirements.—For the past several years the Committee has reduced reporting requirements and changed various thresholds in order to reduce the amount of out-of-cycle actions which must be reviewed by the Committee. The Committee will continue to review possible reductions to the reporting requirements placed on the Pentagon. Future reductions will be based on the Department demonstrating an ability to provide careful oversight on below threshold actions not reported to the Congress. All reporting requirements, thresholds, et cetera, in effect for fiscal year 1989, shall remain in effect during fiscal year 1990, unless specifically changed by the fiscal year 1990 bill or report.

Contract execution.—The Committee directs that the Department notify the Committees on Appropriations 21 days prior to awarding any military construction contract for a project that has not achieved 100 percent design status or for a contract that is other than a firm-fixed price. The notifications must include specific justification for proceeding with project execution. Projects may not be executed until the 21-day interval has elapsed or the Committees grant specific approval for proceeding.

Minor construction.—The Committee agrees with House report language specifying notification procedures for minor construction. The Committee is concerned that the services appear to be stretching the minor construction threshold to the limit. It has been the Committee's experience that some projects originally notified to Congress as costing just under the threshold end up exceeding the statutory cap for minor construction projects. The services are reminded that projects over the minor construction threshold must be programmed in the regular military construction budget. No contract for a minor construction project should be signed if it is apparent the project cannot be completed within the minor construction cap. Further, since the minor construction cap increases in fiscal year 1990 from $1,000,000 to $1,500,000, the Committee expects this new flexibility will be conducive to improved minor construction project execution by the services.

Planning and design.—The Committee has reduced the overall request for planning and design activities of the active services and

defense agencies. The reductions reflect the Committee's view that future military construction activities must be moderated due to constraints on the budget.

Program, project, and activity.—For purposes of the Balanced Budget and Emergency Deficit Control Act of 1985 (Public Law 99–177) as amended by the Balanced Budget and Emergency Deficit Control Reaffirmation Act of 1987 (Public Law 100–119), the term "Program, project, and activity" will continue to be defined as the appropriation account, consistent with the definition as stated in the fiscal year 1988 conference agreement.

MILITARY CONSTRUCTION, ARMY

Appropriations, 1989	$1,141,292,000
Budget estimate, 1990	745,300,000
House allowance	834,222,000
Committee recommendation	726,075,000

The Committee is recommending $726,075,000 for the Army for fiscal year 1990. This amount reflects a decrease of $19,225,000 to the budget request.

Significant project changes from the House-passed bill are discussed below: (See table at the end of the report for complete program recommendations.)

UNAUTHORIZED PROJECTS

The following projects were included in the House-passed bill but were not approved in the Senate-passed authorization bill and, therefore, are not recommended by the Committee:

Colorado: Fitzsimmons Army Medical Center: Child development center	$2,100,000
Illinois: Savanna Army Depot: Function test range	850,000
Maryland: Aberdeen Proving Ground: ADP facility addition	1,700,000
North Carolina:	
Fort Bragg:	
Child development centers	5,300,000
Maintenance facility	7,000,000
SOF-special operations headquarters	21,000,000
Texas:	
Fort Bliss:	
Barracks modernization	6,400,000
Barracks modernization	6,800,000
Fort Hood:	
Barracks modernization	11,200,000
Vehicle wash facility	7,400,000
Virginia: Fort Lee: Petroleum training facility	8,300,000
Germany:	
Augsberg: Electrical power system upgrade	600,000
Vilseck: Chapel center/child development center	3,320,000
Korea:	
Camp Casey:	
Barracks	21,000,000
Tactical equipment shop	3,200,000
Camp Gary Owen:	
Barracks	2,450,000
Tactical equipment shop	1,750,000
Camp Hovey:	
Special operations aircraft maintenance hangar	8,200,000
Tactical equipment shop	7,100,000
Unspecified worldwide locations: Foreign currency fluctuation	57,923,000

AUTHORIZATION ADDITIONS

The following projects and project additions were not included in the House-passed bill but were approved in the Senate-passed au-

thorization bill, and the Committee supports the projects at the levels noted:

Alaska: Fort J.M. Wainwright: Physical fitness training center	$14,800,000
District of Columbia: Walter Reed Medical Center: Parking structure	11,000,000
Georgia: Fort Benning: Barracks revitalization	2,000,000
Illinois: Mel Price Support Center: Alter dormitory	3,750,000
Kansas: Fort Leavenworth: Child development/religious education facility (addition)	2,500,000
Kentucky: Fort Knox: M-1 tank driver training facility	6,500,000
Maryland: Fort Detrick: Chapel center/child development center (additions)	1,000,000
Oklahoma:	
Fort Sill:	
Child development/religious education facility (addition)	2,150,000
Unit chapel	2,000,000
Texas: Fort Sam Houston: Medical center complex	3,550,000
Conus classified:	
Classified locations:	
Classified project	3,400,000
Land acquisition	600,000
Operational facility	7,500,000
Germany:	
Hohenfels: Hardstand and maintenance sheds	4,250,000
Various sites: Wartime host nation support	4,150,000
Vilseck: Hardstand/tactical equipment shop and sheds	8,850,000

Wartime host nation support, Germany.—The Committee has provided $4,150,000 for the United States share of construction associated with a 1982 bilateral host nation support agreement with the Federal Republic of Germany. The Committee shares the concern of the House with the increased costs of the program. However, the Committee believes that the United States European Command is seeking to negotiate an agreement with the German Government which will reduce future United States costs. The Committee also points out that costs have increased because the number of supported sites has increased, thus strengthening the program.

DEFERRED PROJECTS

The Committee is deferring the following projects due to constraints on the budget:

Germany:	
Grafenwoehr: Multipurpose training range	$6,500,000
Hanau: Aircraft parking apron refueling facility	8,300,000
Mainz: Aviation unit maintenance hangar	12,000,000
Weurzburg: Ammunition storage	1,400,000
Vilseck: Post office	1,300,000

Grafenwoehr, Germany.—The Committee has denied, without prejudice, $6,500,000 for a multipurpose training range at Grafenwoehr, Germany. The Committee would support a reprogramming for this project and directs the Department to submit a reprogramming immediately following enactment of the Military Construction appropriation bill.

Various locations Germany.—The Committee has reduced funding for the Army's initiative to station AH-64 Apache helicopters in Germany. While the Committee supports the stationing effort, the Committee notes that these projects are eligible for NATO infrastructure funding. The Committee expects the Department to recoup from NATO the funds unilaterally appropriated for these

facilities and directs the Department to secure NATO funding for all remaining construction activities.

RESEARCH AND DEVELOPMENT CONSTRUCTION

Research, development, testing and evaluation [RDT&E] construction, authorized by the Senate-passed authorization bill, is approved by the Committee for funding in the "Military construction" account. The amount funded follows:

RDT&E, minor construction	$10,296,000

OTHER CHANGES

Fort Gordon, GA.—The Department is directed to initiate design of a consolidated soldier service center at Fort Gordon, GA, and to request construction funds for the project in the fiscal year 1991 budget request.

Fort Benning, GA.—The Committee notes the Department has determined that no existing section 6 school will be transferred to local school districts. Therefore, the Committee directs the Secretary of Defense to move forward with previously deferred section 6 school construction projects. Specifically, the Committee directs the Department to include $8,600,000 in the fiscal year 1991 budget request to support construction of designed projects at Broughton Heights and White School which support students from military families assigned to Fort Benning, GA.

Tobyhanna Army Depot, PA.—The Committee notes the growing traffic problem between Interstate 380 and the Tobyhanna Army Depot, PA. Therefore, the Department is encouraged to propose sufficient funds to provide the appropriate Federal share of construction of an access road, consistent with section 103 of this bill.

Brooke Army Medical Center, TX.—The Committee is concerned that, because of a bureaucratic error, the Army was unable to request funds—approximately $15,200,000—for construction of the research laboratory associated with the Army Burn Center at Brooke Army Medical Center, Texas. The Committee feels strongly that failure to construct this facility will degrade the Army's ability to continue to make advances in the treatment of life-threatening burns—a loss of significance not only to the military community, but to the civilian community as well. Therefore, the Committee directs the Army to include funds in its fiscal year 1991 military construction request for this critical research facility.

Walter Reed Army Medical Center annex, MD.—The Committee directs the Army to provide up to $3,000,000 for necessary repairs to facilities at the Walter Reed Army Medical Center's Forest Glen, MD, annex. The Committee is also aware of the Army's long-range plans to construct military housing in the Walter Reed annex and of the concerns about the potential impact of such a project on the local community and on the historic buildings and woodlands located at the site. The Committee directs the Army to work with the county government and citizens groups in the planning process. Plans for any new construction on the site should be as sensitive as possible to the historic fabric as well as to the other various community interests.

Kapalama Military Reservation, HI.—The Committee has included bill language requiring that the U.S. Army convey title and all accompanying rights of approximately 17.8 acres of ceded lands at Kapalama Military Reservation to the State of Hawaii. This portion of the Kapalama Military Reservation is ceded lands—lands held in trust that were ceded to the Federal Government for a military purpose. In light of this trust obligation, the U.S. Army is returning the approximately 17.8 acres to the State of Hawaii, since its military purpose has ended. The Committee understands that the State of Hawaii will pay the fair market value for any Federal improvements to the land. There are several warehouse buildings containing asbestos on this parcel. Accordingly, the Committee is hopeful that the Secretary, in determining the fair market value thereof, will properly consider the cost of asbestos removal.

Army Materials Technology Development Laboratory.—The Committee is concerned about the move of the Army Materials Technology Laboratory. The plan to disaggregate the laboratory upon closure of the present Watertown, MA, facility did not consider the possibility of relocation to an enhanced research environment such as a university-based research and technology development park. While the Committee is aware that this relocation is directed by the Base Closure Commission, there may be other laboratories, as well as the Watertown site, which could benefit from an enhanced research environment. Therefore, the Department of the Army is directed to evaluate the feasibility of moving the laboratory, in total, to a materials science-oriented university setting. The report, to be submitted to the Committee not later than February 15, 1989, should review the economic and technical costs and benefits of such a move. The Department of the Army is further directed to include input from all other agencies of the Department of Defense with similar requirements.

Planning and design.—The Committee has included an additional $5,000,000 for Army planning and design to be utilized exclusively for design of projects for the Joint Special Operations Command. The funds may be utilized for design of JSOC projects of any military service.

MILITARY CONSTRUCTION, NAVY

Appropriations, 1989	$1,576,516,000
Budget estimate, 1990	1,133,200,000
House allowance	1,167,750,000
Committee recommendation	1,151,783,000

The Committee is recommending $1,151,783,000 for Navy and Marine Corps military construction projects in fiscal year 1990. This amount reflects an increase of $18,583,000 from the budget request.

Significant project changes from the House-passed bill are discussed below: (See table at the end of the report for complete program recommendations.)

UNAUTHORIZED PROJECTS

The following projects were included in the House-passed bill but were not approved in the Senate-passed authorization bill and, therefore, are not recommended by the Committee:

California:	
Monterey Fleet Numerical Oceanography Center: Computer center	$6,010,000
Monterey Naval Postgraduate School: Child development center	2,000,000
San Diego Naval Hospital: Parking garage	7,500,000
San Diego Naval Training Center: Child development center	2,350,000
Vallejo Mare Island Naval Shipyard: Dredged material handling facility	2,700,000
Florida: Mayport Naval Station: Industrial berthing wharf	20,000,000
North Carolina: Camp Lejeune Marine Corps Base: Access road	5,500,000
Rhode Island: Newport Naval Education and Training Center: Parking lot	290,000
Japan:	
Atsugi Naval Air Facility: Maintenance hangar	14,900,000
Okinawa Camp Butler Marine Corps Base: Combined Army staff trainer facility	3,200,000
Okinawa Futenma Marine Corps Air Station:	
Maintenance hangar addition	1,950,000
Tactical support van pods	5,500,000
Spain: Naval Station Rota: Child development center	880,000
United Kingdom:	
London naval activities:	
Automotive vehicle maintenance shop	730,000
Bachelor enlisted quarters	9,400,000

AUTHORIZATION ADDITIONS

The following projects and project additions were not included in the House-passed bill but were approved in the Senate-passed authorization bill, and the Committee supports the projects at the levels noted:

Georgia: Albany Marine Corps Logistics Base: Calibration lab	$3,250,000
Maryland: Annapolis Naval Academy: Bancroft Hall expansion	24,000,000
Missouri: Kansas City MC support activity: Finance and data processing center (phase I)	10,000,000
North Carolina:	
Camp Lejune Marine Corps Base: Operations center	7,000,000
New River Marine Corps Air Station: Physical fitness center	2,450,000
Pennsylvania: Philadelphia Naval Shipyard: Hazardous and flammable storage	10,000,000
Bahamas: Andros Island: Physical security improvements	4,140,000

Pascagoula, MS.—The Committee has approved the following three projects at Naval Station Pascagoula, MS, which were previously authorized by the Congress:

Bachelor enlisted quarters	$3,940,000
Magazines	3,140,000
Warehouse	1,110,000

DEFERRED PROJECTS

The Committee is deferring the following projects due to constraints on the budget:

California:	
Monterey Naval Postgraduate School:	
Academic library addition	$5,000,000
Classroom and lab facility	11,690,000

RESEARCH AND DEVELOPMENT CONSTRUCTION

Research, development, testing and evaluation [RDT&E] construction, authorized by the Senate-passed authorization bill, is approved by the Committee for funding in the "Military construction" account. The amount funded follows:

RDT&E, minor construction	$7,565,000
Large cavitation channel, Memphis, TN (phase III)	16,188,000

OTHER CHANGES

Naples, Italy.—The Committee is concerned that the Navy has failed to obligate funds provided last year for increment I of the Naples headquarters relocation. Consequently, funds provided in this bill for increment II may not be spent until the Navy provides the Congress with a report outlining the extent of local and national Italian support for the project and a specific schedule for accomplishing all phases of the project. The Committee further directs that funds provided in this bill for increment II shall be transferred to the Department of Defense "Foreign currency fluctuation" account if the Navy fails to secure local project approvals and is unable to obligate last year's appropriation by March 31, 1990.

Earle Naval Weapons Station, NJ.—Due to safety and environmental concerns associated with the proposed naval ship fuel replenishment system [SFRS] at the Earle Naval Weapons Station in Monmouth County, NJ, the Committee directs the Navy to spend no funds on this project during fiscal year 1990.

Puget Sound Naval Shipyard, WA.—The Committee agrees with House language regarding the Puget Sound Naval Shipyard and directs the Navy to expedite planning for the acquisition of additional land.

Dam Neck, VA.—The Department is directed to utilize emergency construction authority to request a reprogramming of $8,000,000 to renovate existing facilities and construction of auxiliary facilities (project P-335) at the marine environmental systems facility [MARESFAC] in Dam Neck, VA. The Department is directed to include in the fiscal year 1991 budget request sufficient funds to construct a boat launch facility for MARESFAC.

NAS Fallon, NV.—The Committee has included a legislative provision prohibiting the Navy from entering into agricultural leases of more than 1 year's duration on land in and around Naval Air Station Fallon, NV. The Navy is directed to provide the Committee with a report by November 15, 1989, indicating that this legislative provision will be complied with throughout fiscal year 1990.

Mountain Warfare Training Center, CA.—The Committee has learned that facilities at the Marine Corps Mountain Training Center in Bridgeport, CA, have fallen into such a state of disrepair that marines' health and safety are seriously jeopardized. The elimination of these health and safety hazards require the immediate obligation of $14,300,000 for several military construction and minor construction projects. These requirements came to the attention of the Congress subsequent to the Senate's approval of the National Defense Authorization Act for fiscal year 1990, therefore, none of the projects are authorized. The Committee believes that these projects, however, represent a high priority and will support

an appropriation for these projects in the appropriations conference report should they be authorized by the conferees on the defense authorization. The Committee would also support utilizing emergency construction authority to support a reprogramming request to provide these funds.

MILITARY CONSTRUCTION, AIR FORCE

Appropriations, 1989	$1,225,926,000
Budget estimate, 1990	1,393,300,000
House allowance	1,208,136,000
Committee recommendation	1,098,249,000
Rescission	−18,500,000
Net	1,079,749,000

The Committee has recommended $1,079,749,000, including a rescission, for the Air Force in fiscal year 1990. The recommendation amounts to a decrease of $313,551,000 from the budget request.

Air Force liaison.—Earlier in the year, Air Force officials reorganized legislative liaison functions in a manner contrary to existing law. The Committee is concerned that the reorganization will reduce the ability of the Air Force Comptroller to provide effective internal oversight over Air Force military construction and engineering functions. The Committee believes the ACBIC organization provided both effective oversight and quality liaison to the Congress. The professionalism and integrity of the personnel assigned to ACBIC served to strengthen the Air Force's relationship with the Committee. The Committee understands the Air Force is considering still another liaison reorganization. Under the new proposal, liaison to the Committee would be folded into the jurisdiction of the Chief of Air Force Legislative Liaison. The Committee believes the Air Force needs to maintain direct comptroller authority over liaison provided to the Appropriations Committees. A new layer of liaison bureaucracy could further reduce the Air Force's ability to effectively provide service to the Appropriations Committees. Whatever organization is finally selected, the Committee hopes the new Air Force liaison organization will develop the same integrity and candor the Committee grew to expect from ACBIC.

The Committee is also concerned that the Air Force engineers organization has been actively engaged in lobbying efforts on behalf of civil engineering programs and projects. The Committee and Members of the Senate have received a number of telephone calls from base commanders and other individuals to lobby on behalf of specific programs and projects. The Air Force is reminded that such lobbying efforts are prohibited by law. Senior Air Force officials should assure that members of the Air Force engineering community do not engage in prohibited lobbying practices.

Significant project changes from the House-passed bill are discussed below: (See table at the end of the report for complete program recommendations.)

UNAUTHORIZED PROJECTS

The following projects were included in the House-passed bill but were not approved in the Senate-passed authorization bill and, therefore, are not recommended by the Committee:

Alabama:	
Maxwell AFB:	
Add/alter consolidated support complex	$700,000
Visiting officers quarters	820,000
Arkansas:	
Eaker AFB:	
Civil engineer shop facility	2,700,000
Convoy road	500,000
Military vehicle service station	600,000
Water well and elevated storage	850,000
Little Rock AFB:	
Add/alter dorms	1,500,000
Personnel processing center	7,000,000
California:	
Castle AFB:	
Combat arms training and maintenance facility	730,000
Security police operations facility	2,950,000
Ramp safety lighting	5,000,000
McClellan AFB: Upgrade electrical distribution system	9,500,000
Vandenberg AFB: Child care center	2,050,000
Colorado:	
Lowry AFB:	
Computer operations center	15,500,000
Precision measurement equipment laboratory	2,200,000
Florida: Tyndall AFB: Add/alter child development center	1,200,000
Indiana: Grisson AFB: Wastewater treatment plant modernization	4,650,000
New York: Griffin AFB: SAC rebasing-hydrant fueling system	7,400,000
North Dakota: Grand Forks AFB: Child care center	1,900,000
Utah: Hill AFB: Procurement facility consolidation	3,700,000
Germany:	
Hahn AFB: Upgrade water storage	3,800,000
Sembach AB: Security police operations facility	1,800,000
Spangdahlen AB: Add/alter water storage	4,700,000
Japan:	
Kadena AB:	
KC-135:	
Add/alter flight simulator training	2,300,000
Fire protection maintenance facility	2,000,000
Yokota AB: Jet fuel storage	4,700,000
Korea:	
Kunson AB:	
Aircraft fuel systems repair dock	3,000,000
Alter munitions storage facility	3,200,000
Avionics facility	4,700,000
ECM pod shop	1,400,000
War readiness storage facility	840,000
Osan AB:	
Aircraft parts distribution facility	3,000,000
Alter avionics facility	510,000
F-16: Add to engine repair facility	800,000
Security police operation facility	2,400,000
War readiness material vehicle storage	840,000
Spain: Zaragoza AB: Aerospace support equipment shops	1,950,000
Turkey:	
Ankara: Combat readiness center	4,200,000
Incirlik AB:	
CW protection avionics facility	3,850,000
Water distribution	960,000
United Kingdom:	
High Wycombe: Dormitory	4,100,000
RAF Alconbury: Add/alter physical fitness center	2,900,000
RAF Bentwaters:	
Central post office	1,100,000
Youth center	1,850,000
RAF Fairford:	
Jet fuel storage/hydrant system	6,900,000
Upgrade water storage	2,700,000

RAF Lakenheath: Storm drainage disposal	860,000
RAF Mildenhall: Jet fuel storage	3,400,000

B–2 reduction.—The Senate-passed authorization bill also included a general reduction of $50,000,000 specifically against B–2 construction at Whiteman AFB, MO. The Committee has included the B–2 general reduction as approved by the Senate.

AUTHORIZATION ADDITIONS

The following projects were not included in the House-passed bill but were approved in the Senate-passed authorization bill, and the Committee supports the projects at the levels noted:

Alaska:	
Elmendorf AFB: Combat arms training facility	$2,400,000
Eielson AFB: Supply complex	10,000,000
Arizona: Davis Monthan AFB: Traffic management facility	4,000,000
California: Edwards AFB: Corrosion control facility	6,500,000
Colorado:	
Peterson AFB: Supply warehouse	4,000,000
Space operations training center	12,200,000
Florida: MacDill AFB: Wing operations building	3,050,000
Illinois: Scott AFB: Dormitories	8,400,000
Indiana: Grissom AFB: Wing headquarters command post	2,150,000
Louisiana:	
England AFB:	
Base supply complex	4,100,000
Alter dormitories	3,200,000
Michigan: R.I. Sawyer AFB: Fitness center	4,300,000
Ohio:	
Wright-Patterson AFB:	
Lab fuel storage facility	5,500,000
Add/alter optical system lab	3,700,000
Utah: Hill AFB: Missile maintenance shop	2,350,000
Oman:	
Seeb AB: War readiness material warehouse	2,200,000
Thumrait AB:	
Airfield improvements	17,000,000
War readiness material warehouse	6,600,000

Child care centers, new authorizations.—The Senate-passed authorization bill includes an additional $8,510,000 for seven child care centers at various Air Force bases. The Committee understands that construction of these facilities would permit the Air Force to implement a new policy of allowing dependents of civilian employees to utilize military child care facilities at certain installations. If these projects are approved by the conferees on the authorization bill, the Committee will consider a reprogramming to fund these facilities once the Secretary of Defense reviews the Air Force Logistic Center's plan and certifies that the plan is in the best interest of the Department of Defense and represents no precedent for establishing a new program of providing child care to civilian DOD employees' dependents. The Committee believes that emphasis must continue to be placed on providing child care to the dependents of military families.

Minor construction.—The Committee directs the Air Force to use minor construction funds to accomplish the following project included in the Senate-passed Defense authorization bill.

Louisiana: England AFB: Flightline fence and lighting	$300,000

DEFERRED PROJECTS

The Committee is deferring the following projects due to constraints on the budget:

California:	
Beale AFB: Dormitory	$5,600,000
McClellan AFB: Vehicle maintenance facility	5,000,000
Delaware: Dover AFB: Operations command post	4,200,000
Florida:	
Patrick AFB: Dining facility	3,800,000
Homestead: Add to transient dormitories	1,950,000
Texas: Laughlin AFB: Base engineers complex	3,750,000
Wyoming: F.E. Warren AFB: Missile assembly facility	24,000,000
Germany:	
Hahn AB: Training/software maintenance facility	1,400,000
Ramstein AB: Add/alter vehicle maintenance facility	2,800,000
Zweibrucken AB: Passive defense equipment storage facility	1,150,000
Guam: Andersen AB: Alter dormitory	6,500,000
Korea: Osan AB: F-16 maintenance unit facility	3,450,000
Philippines: Clark AB: Dormitories	6,100,000
Portugal:	
Lajes Field:	
Combat repair equipment storage	1,600,000
Hydrant fueling facility	6,100,000
United Kingdom:	
RAF Bentwaters: Add to/upgrade fire station	1,250,000
RAF Lakenheath: Chemical warfare protection	2,200,000
RAF Mildenhall: Upgrade sewage treatment	1,650,000

RAF Upper Heyford, United Kingdom.—The Committee has approved $1,000,000 to alter munitions storage facilities at RAF Upper Heyford in the United Kingdom. The Committee directs that the additional $4,350,000 needed to accomplished this project be reprogrammed from savings from the fiscal year 1989 project to alter munitions storage at Hahn Air Base, Germany.

Forward operating locations, Canada.—The Air Force failed to provide the Committees with a responsive report outlining the specific plans and costs for the United States share of upgrading Canadian military facilities. The Secretary of Defense is, therefore, required to review the Air Force program and provide the Committee with a detailed report on these projects by February 15, 1990. If the Secretary concludes these projects represent valid military requirements, the Committee directs that any future financing be accomplished through the NATO infrastructure account in order to reduce the U.S. share of construction.

Patrick AFB, FL.—The Committee has denied funding $3,800,000 for a new dining facility at Patrick AFB, FL. The Committee supports construction of a new dining facility but notes that the approved base master plan includes funding the project only after other projects are accomplished. The Committee, therefore, directs the Air Force to request future projects at Patrick Air Force Base in accordance with the sequence identified in the base master plan.

F.E. Warren AFB, WY.—The Committee has denied funding $24,000,000 for construction of a missile assembly building to support the rail garrison deployment of the MX Peacekeeper missile at F.E. Warren Air Force Base in Wyoming. The Committee notes that the General Accounting Office has reported that missile assembly could be accomplished at an existing facility at Vandenberg AFB, CA. In view of severe constraints on the budget, the Commit-

tee agrees with GAO and directs the Air Force to structure MX missile assembly activities in a manner that maximizes the use of facilities at Vandenberg.

MacDill AFB, FL.—The Committee directs that $940,000 be provided from minor construction for a fuels mobility support equipment warehouse at MacDill AFB, FL.

Honduras, various locations.—The Committee has denied funding for two projects in Honduras. This issue is previously discussed in the report under "Items of Special Interest, Central American construction."

Crotone, Italy.—The Committee has deleted funding requested for facilities at Crotone, Italy, to support the relocation of the 401st Tactical Fighter Wing. This issue is discussed in detail at the beginning of the report under "Items of Special Interest—Burden Sharing."

Berbera, Somalia.—The Committee has denied funding two projects totaling $15,000,000 to support the United States Central Command in Somalia. While the Committee continues to support construction of access facilities in the Central Command's area of operation, the Committee questions the value of additional construction at Berbera particularly in light of the current military and political situation in the country. The Committee would support a reprogramming to provide similar construction in another regional location. The Committee directs the Department to utilize existing emergency construction authority should a new location become available.

Plattsburg AFB, NY.—The Committee directs that $1,000,000 be provided from minor construction funds for a noise suppressor support facility at Plattsburg AFB, NY.

Mehlingen, Germany.—The Committee has denied, without prejudice, $1,100,000 for an operations facility at Mehlingen Annex, Germany. The Committee would support a reprogramming for this project and directs the Department to submit a reprogramming request immediately following enactment of the Military Construction appropriation bill.

Rescission.—The Committee has approved a rescission of $18,500,000 appropriated in fiscal year 1989 for an Aerospace Data Facility at Buckley Air National Guard Base in Colorado. The Committee understands the project is being accomplished by cross-funding the project with savings generated from fiscal year 1988 funds. Therefore, the fiscal year 1989 funds appropriated for the project are no longer needed.

Planning and design.—The Committee has reduced Air Force planning and design by $20,000,000 to reflect a more realistic pace for future construction activities. The Committee has approved $86,000,000 for Air Force planning and design activities, the largest planning design account funded in this bill. Pending before the Committee is a request to reprogram an additional $18,500,000 into planning and design activities for the current fiscal year, 1989. The Committee denies the reprogramming in view of the construction project reductions made in this bill.

RESEARCH AND DEVELOPMENT CONSTRUCTION

Research, development, testing and evaluation [RDT&E] construction, authorized by the Senate-passed authorization bill, is approved by the Committee for funding in the "Military construction" account. The amount funded follows:

RDT&E, minor construction	$9,414,000
Edwards AFB, CA: Four projects	1,370,000
Hanscom, AFB, MA: Development and evaluation facility	690,000
Kirtland AFB, NM: Atmospheric compensation facility	1,300,000
Wright-Patterson AFB: Three projects	800,000
Arnold Engineering Development Center, TN: Seven projects	5,449,000
Various locations:	
Peacekeeper rail garrison basing	16,300,000
Reentry System Launch Program	1,500,000

OTHER CHANGES

Morocco training range.—The Committee understands the Air Force is considering the development of an expensive new air combat training range in Morocco. The Committee believes it would be unwise to undertake a major expansion of training ranges outside the United States without careful consideration and negotiation. Recent results of base rights negotiations indicate the folly of providing vast sums for facility investment in many foreign countries. Therefore, the Air Force is required to provide the Committee with a detailed report by February 15, 1990, outlining specific plans for training range development outside the United States.

National asset initiative.—The Committee has learned that the Air Force is planning to fund through the "Research and development" account a $52,000,000 military construction project in fiscal year 1992 to upgrade the aging climatic lab at Eglin AFB, FL. The Committee strongly opposes the use of R&D funds as a substitute for military construction. The Air Force is directed to place the climatic lab project in the military construction program and cease the development of the so-called national asset initiative which seeks to fund military construction projects from research and development.

Vandenberg AFB, CA.—The Committee shares the concern of the House with the slow pace of the Air Force in planning and programming for acquisition of necessary land interests in the surrounding area of Vandenberg Air Force Base. The Committee understands that such property interests are necessary in connection with current mission as well as future mission profiles. Therefore, the Department is directed to complete necessary land appraisals by October 1989 and begin negotiations with various land owners so that real estate acquisition can begin in fiscal year 1991. The Committee expects that the Air Force, where appropriate, will give high priority to acquiring restrictive easements in order to minimize cost of acquisition in fee. The Department is directed to include initial funds in the fiscal year 1991 budget as the first increment of a 3-year level funding program.

The Committee understands that the Air Force is considering the use of research and development funds to build new Titan IV launch facilities at Vandenberg. The Committee strongly opposes the use of R&D funds for what is a military construction project.

Therefore, the Committee directs that construction of Titan IV facilities, whether a new launch pad (SLC-7) or construction at an existing pad (SLC-6), must be funded in the military construction account.

Arnold Engineering Development Center, TN.—The Committee has approved the request for $66,000,000 for phase II of construction of the J-6 Large Rocket Test Facility at Arnold Engineering Development Center in Tullahoma, TN. Earlier this year the Department of Defense Deputy Inspector General raised questions concerning the justification for proceeding with this project. The Deputy Secretary of Defense reviewed the inspector general's conclusions and the Air Force's justification for proceeding and concluded that construction of the project is in the best interest of the United States. The Committee agrees with Secretary Atwood's decision. The J-6 project will provide the capability to safely test highly volatile new propellants at a thrust of 500,000 pounds at a simulated altitude of 100,000 feet. Without this project, the Air Force would be unable to safely conduct necessary tests on large rocket motors. The Committee directs the Department to proceed expeditiously with this project and to provide the Committee with a report on project milestones by November 21, 1989.

The Committee has also included a legislative provision which directs the Air Force to provide 250 acres for a landfill at AEDC to be used by the Elk Regional Resource Authority. The property should be adjacent to or in close proximity to Tennessee Highway 55. The Air Force shall provide the Committees by November 15, 1989, notification that the requirement of this legislative provision has been complied with.

Elmendorf AFB, AK.—The Committee understands that as part of the fiscal year 1990 budget amendment, the Air Force deferred construction of a new enlisted dormitory facility at Elmendorf AFB. The availability of this facility will permit the consolidation of both housing and administrative operations at Elmendorf, and has been identified as a top priority of the Alaska Command. To the extent that savings or adjustments in other projects make additional funds available, the Committee urges the Air Force to expedite the design, engineering, and site preparation for this facility during fiscal year 1990, to permit the earliest possible occupancy of this dormitory. Actions taken during 1990 could make this facility available in 1992, meeting anticipated expanded housing requirements at Elmendorf AFB.

Alaskan Command.—The Department of Defense established the subunified Alaskan Command as a component of the Pacific Command on July 9, 1989. The additional responsibilities, command, control, and communications requirements and personnel necessary for this organization will quickly expand. The Committee requests the Department to evaluate the requirements for a consolidated command center for the Alaskan Command, and provide a plan for addressing these needs not later than December 1, 1989. The Committee expects the Department's request for military constructions appropriations for fiscal year 1991 to include funds to implement the conclusions and recommendations of the December 1, 1989 report.

Makah Air Force Station, WA.—The Committee directs the Department of the Air Force to provide $400,000 from the unspecified minor construction account to the Makah Indian Tribe for repairs to the electrical and sewer systems at the recently decommissioned Makah Air Force Station, Near Bay, WA.

The existing electrical system at this site does not meet national, State or county electrical codes, because the Air Force was exempt from these codes. The sewer systems' current activated packaged sludge treatment plant is also not currently usable by a civilian user. These systems must be upgraded to accommodate a new user for this site, who will place a drug and alcohol rehabilitation center for Indian tribal members at this facility.

MILITARY CONSTRUCTION, DEFENSE AGENCIES

Appropriations, 1989	$679,533,000
Rescission	−19,548,000
Net, 1989	659,985,000
Budget estimate, 1990	596,200,000
House allowance	531,320,000
Rescission	−30,000,000
Net	501,320,000
Committee recommendation	468,332,000
Rescission	−21,800,000
Net	446,532,000

The Committee has recommended $446,532,000, including rescissions, for projects considered within the "Defense agencies" account. The amount recommended reflects a decrease of $149,668,000 to the budget request.

Significant project changes from the House-passed bill are discussed below: (See table at the end of the report for complete program recommendations.)

UNAUTHORIZED PROJECTS

The following projects were included in the House-passed bill but were not approved in the Senate-passed authorization bill and, therefore, are not recommended by the Committee:

California: Defense Language Institute, Monterey: General instruction facility (phase III)	$10,600,000
Colorado: Fitzsimmons Army Medical Center: Life safety upgrade	5,200,000

AUTHORIZATION ADDITION

The following project was not included in the House-passed bill but was approved in the Senate-passed authorization bill, and the Committee supports the project at the level noted:

Alaska: Adak Naval Air Station: Fleet hospital facility 23	$18,000,000

DEFERRED PROJECTS

The Committee is deferring the following projects due to constraints on the budget:

California: Defense Depot Tracy: Subsistence warehouse	$24,000,000

Nevada: Nellis AFB: Misty Zephyr Test Site	6,542,000
Virginia: Pentagon complex: Incinerator	3,500,000
Bermuda: Roger B. Chaffee Elementary School: Addition	4,810,000
Germany:	
Augsburg: High school addition	6,300,000
Frankfurt: Edwards elementary school	7,101,000
Hohenfels: Middle/high school addition	9,902,000
United Kingdom: Bicester: Elementary school	6,275,000
Planning and design: Washington headquarters services	5,180,000

Overseas dependent schools.—The Committee directs that none of the funds provided for dependent schools projects in Germany and the United Kingdom may be obligated until the Department has certified that the specific locations will be compatible with conventional arms control reduction proposals. Projects in locations which could be closed or missions substantially reduced should not be obligated.

Various overseas locations, contingency and fleet hospitals.—The Committee agrees with the House and has denied funding for two contingency hospitals at Echternach, Luxembourg, and RAF Chessington, United Kingdom, and two fleet hospitals at Camp Carroll, Korea, and RAF Lanark, United Kingdom. The Committee has denied, without prejudice, a second echelon medical logistics storage facility at Zaragoza Air Base, Spain. The Committee directs the Department to seek host nation support for overseas fleet hospital projects in the Pacific. The Committee also directs the Department to seek a change in NATO criteria to permit contingency and fleet hospitals in Europe to be fully funded through the NATO infrastructure program.

Misty Zephyr test site, NV.—The Committee has deferred utilizing military construction funds for this classified project. This project will be funded through the research and development accounts in the Defense appropriations bill.

OTHER CHANGES

SDI national test bed, Colorado.—The Committee has included $23,000,000 to complete the final phase of construction of the Strategic Defense Initiative national test bed at Colorado Springs, CO. The Committee is concerned with the cost growth on this project. Serious design and construction errors have occurred during the execution of what should have been a relatively simple construction undertaking. The Corps of Engineers is directed to provide the Committee with a report outlining the specific reasons for the project cost overrun and the actions being taken to recoup project costs in those instances of contractor noncompliance. The report must be made available and reviewed by the Committee prior to obligation of the $23,000,000 provided by this bill.

The Committee is also very concerned that the Strategic Defense Organization was planning to utilize research and development funds, without notifying the Committee, to complete the national test bed which has been funded entirely in the past with military construction funds. The SDIO is directed to be more vigilant in determining the appropriate funding sources in the future.

Rescission.—The Committee has reduced the House-recommended rescission of classified fiscal year 1989 funds by $8,200,000. This

amount has been previously utilized as a reprogramming source for a project supporting the National Security Agency.

White Sands Missile Range, NM.—The Committee has learned that the Defense Nuclear Agency is proposing to build a large blast and thermal simulator at White Sands Missile Range, NM, utilizing research and development funds. The Committee has reviewed this project and determined that funding should be provided in the military construction account. Therefore, the Department is directed to provide DNA with sufficient planning and design funds to support this project in fiscal year 1990. Construction funds for the project should be included in the fiscal year 1991 military construction request.

Defense agencies reprogrammings.—The Committee provides funding to all defense agencies through one appropriation account. The Committee does not provide appropriations separately to each individual Defense agency. The Committee, therefore, directs that savings from any particular Defense agency project may be utilized as a reprogramming source for any other Defense agency. The Department is directed to inform each Defense agency that project savings do not remain available for use only by the agency generating the savings.

Planning and design.—The Committee has denied $5,180,000 requested to initiate design of the Pentagon rehabilitation project. This project is discussed earlier in the report under the section "Items of Special Interest, Pentagon rehabilitation."

The Committee has eliminated specific earmarks for planning and design by agency. Instead the Committee has approved $55,000,000 to be utilized for defense agencies planning and design. These funds should be obligated by the Department in the same manner as in previous years.

Last year the conference report accompanying the Military Construction Act of 1989, supported language from the Senate report directing the Defense Medical Facilities Office to utilize up to $1,000,000 to initiate planning and design of an aerospace medicine facility at Grand Forks, ND. The Department has failed to implement this directive. Consequently, the Committee has included bill language preventing the expenditure of funds appropriated for fiscal year 1990 for defense agencies planning and design until the DMFO initiates design of the aerospace medicine facility.

The Committee approves a pending design request for two SDI classified projects, BSTS and EDX. Permission to proceed with design does not commit the Committee to providing military construction funds for these projects in future budgets. Prior to action on the fiscal year 1991 appropriation bill, the Committee will determine whether these projects should be funded through the "Military construction" or the "Research and development" account.

Minor construction.—The Committee has eliminated specific earmarks for minor construction by agency. Instead, the Committee has approved $4,000,000 to be utilized by defense agencies minor construction. These funds should be obligated by the Department in the same manner as in previous years.

NATO Infrastructure

Appropriations, 1989	$492,000,000
Budget estimate, 1990	501,900,000
House allowance	424,714,000
Committee recommendation	462,300,000

The Committee recommendation for the "NATO infrastructure" account is $462,300,000. This appropriation provides the United States share of commonly funded NATO infrastructure in Europe. The Committee recommendation reflects an increase of $37,586,000 from the House allowance.

The Committee continues to strongly support the NATO infrastructure program as the only pure burden sharing program supported by the allies.

A more detailed discussion of this account is included in this report under "Items of Special Interest-Burden sharing: NATO infrastructure and 401st Tactical Fighter Wing."

Military Construction, Guard and Reserve Components

Appropriations, 1989	$605,124,000
Budget estimate, 1990	452,600,000
House allowance	566,728,000
Committee recommendation	717,910,000

The Committee recommends $717,910,000 for military construction projects for the Guard and Reserve components. This amount is $265,310,000 above the budget request and $151,182,000 above the House recommendation.

The Committee strongly supports the Nation's Guard and Reserve component. A discussion of this account is included in this report under "Items of Special Interest—Guard and Reserve."

Individual component recommendations are as follows:

Component	Budget request	Committee recommendation
Army National Guard	$114,000,000	$246,830,000
Air National Guard	164,600,000	251,480,000
Army Reserve	76,900,000	104,000,000
Naval Reserve	50,900,000	62,400,000
Air Force Reserve	46,200,000	53,200,000

PROGRAM ADDITIONS

The following projects were not included in the House-passed bill but represent high-priority activities. The Committee supports the projects at the levels noted:

Alabama Air National Guard: Martin ANGB:	
Base supply	$900,000
Equipment warehouse	2,100,000
Arizona Army National Guard: Show Low: Organizational maintenance sub shop	500,000
Florida Army National Guard: St. Augustine: Armory	2,500,000
Illinois Army National Guard: Urbana: Armory	865,000
Iowa Air National Guard: Souix Gateway Airport:	
Land acquisition	550,000

Base supply warehouse	2,550,000
Add to ECM shop	390,000
Kansas Air National Guard: McConnell AFB: Operation and training facility	3,700,000
Michigan Army National Guard: Camp Grayling: Waste water treatment facility	3,283,000
Mississippi Army National Guard: Camp Shelby:	
Bachelor officer quarters	700,000
M–16 firing range	300,000
Alter engineering building	400,000
Nebraska Army National Guard: Lincoln:	
Combined support maintenance shop	3,438,000
Add to aircraft parking	597,000
New Mexico:	
Army National Guard:	
Clovis: Organizational maintenance shop	714,000
Springer: Organizational maintenance shop	714,000
Army Reserve: Santa Fe: Reserve center	3,000,000
Oregon Air National Guard: Portland IAP: Add/alter taxiway	6,000,000
South Carolina Army National Guard:	
Lexington: Armory	2,400,000
Eastover: Armory	1,500,000
Tennessee:	
Army National Guard:	
Clinton: Armory	1,160,000
Humbolt: Armory	1,453,000
Jackson: Aviation support facility	1,636,000
Air National Guard: Memphis:	
Add/alter aircraft hanger	4,900,000
Aircraft apron/fuel storage	11,800,000
Virginia Army National Guard: Arlington Hall Station: NGB Center, phase III	11,000,000
West Virginia:	
Army National Guard:	
Buckhannon: USP&FO	1,500,000
Wheeling: Aviation support facility/armory	5,326,000
Army Reserve:	
Beckley: Reserve center	3,200,000
Kingwood: Reserve center	1,400,000
Elkins: Reserve center	1,400,000
Morgantown: Reserve center	1,900,000
Rainelle: Reserve center	2,200,000
Wyoming Army National Guard: Cheyenne: Armory annex	2,351,000

Deficiency allowances.—The Committee has included deficiency allowances to the Guard and Reserve components to permit the conferees to fund projects approved in the House-passed bill but not included in the Senate-passed authorization bill. The Committee will support these individual projects once they are approved by the Senate-House conference committee on the Defense authorization bill for fiscal year 1990.

Fargo, ND.—The Committee supports construction of an Armed Forces Reserve center in Fargo, ND. The Committee has included additional planning and design funds for this project. The Department is directed to immediately proceed with design of this facility and include funds for project construction in the fiscal year 1991 budget request.

Various locations, West Virginia.—The Committee directs that the Army Reserve utilize $900,000 from minor construction for land acquisition for the Charleston Reserve center and that the Air Guard utilize $300,000 from minor construction funds for land acquisition at the Yeager ANG Base. The Committee has added sufficient funds to the Guard and Reserve components for the immedi-

ate acceleration of design of high-priority projects in West Virginia. The Department is directed to include these projects in the fiscal year 1991 budget request. The list of projects and estimated cost of construction follows:

Charleston Air National Guard:	
Operations and training addition:	
Site preparation/utilities	$1,600,000
Composite operations and training	5,100,000
Security police facility	600,000
Civil engineering complex	1,800,000
Base supply warehouse	3,000,000
Addition and alteration to Reserve forces operational training facility	1,450,000
Telecommunications facility and upgrade warehouse and hangar	1,465,000
Martinsburg Air National Guard:	
Alterations to small aircraft maintenance dock	490,000
Fire station	1,100,000
Vehicle maintenance shop	1,600,000
Central tower	1,000,000
Small arms range	750,000
Addition to avionics and medical facility	940,000
West Virginia Army National Guard:	
Camp Dawson: Phase IV	1,135,000
Charleston armory and educational facility	1,125,000
Kingwood Army National Guard:	
Armory and educational facility	2,100,000
Organizational maintenance shop	575,000
Ronceverte, Greenbrier County, Army National Guard armory and educational facility	900,000
Gassaway, Braxton County, armory addition and alteration	652,000
Hinton, Summers County, armory addition and alteration	481,000
Oak Hill, Fayette County, armory addition and alteration due to reorganization	1,000,000
Parkersburg Army National Guard:	
Armory and education facility	2,000,000
Maintenance shop	600,000
Princeton Army National Guard armory and educational facility	1,200,000
Richwood, Nicholas County, armory addition and alteration	474,000
Spencer, Roane County, armory addition and alteration	577,000
Welch, McDowell County armory and educational facility	509,000
Army Reserve:	
Grantsville, Calhoun County, Army Reserve center and maintenance shop	1,538,000
Bluefield alterations and expansion to 100-member Army Reserve center	942,000
Charleston Army Reserve center	5,000,000
Clarksburg Army Reserve center	1,345,000
Clarksburg area maintenance supply activity	716,000
Jane Lew/Weston Army Reserve center and organizational maintenance shop	1,183,000
Lewisburg Army Reserve center and organizational maintenance shop	1,025,000
Valley Grove, Ohio County, area maintenance supply activity	834,000
Weirton alterations and expansion to 150-member Army Reserve center	1,282,000
Wheeling Army Reserve center and maintenance shop	1,345,000

Iowa Army National Guard.—The House has included $6,857,000 for land acquisition at Camp Dodge, IA. This project will provide a realistically sized training area contiguous to Camp Dodge which will allow for tactical exercises, small unit maneuvers, and combined arms training all of which are requirements for the mission of a major training area. Currently, no training areas on Camp Dodge are of sufficient size to meet this requirement; and range

construction has reduced the areas available for tactical maneuvers.

The Committee is supportive of this project. However, the Senate Defense authorization bill did not include a recommendation for the project. The Committee will further review the status of this project during conference committee action on this legislation. If funding for the project is not provided in the fiscal year 1990 military construction appropriations bill, the Committee directs the Army National Guard to include this project in their fiscal year 1991 budget request. If funding sources should become available during fiscal year 1990, the Committee will look favorably on a reprogramming request for the project.

Denison, IA, armory.—The Committee is also aware of the requirements for an armory project at Denison, IA. This project was deferred due to funding constraints during budget discussions within the Department of Defense. This $998,000 project is designed and the State matching funds are available. As with the land acquisition project at Camp Dodge, however, no Senate authorization is available. The Committee directs that this project be included in the fiscal year 1991 budget for the Army National Guard; however, if funding sources become available during fiscal year 1990, the Committee would look favorably on a reprogramming request.

Various locations, Tennessee.—The Army National Guard is directed to complete design of armories in Winchester, Dunlap, Smithville, Livingston, Lenoir City, and Erin, Tennessee, and include construction funds for these projects in the fiscal year 1991 budget request.

Burlington, VT.—The Committee is aware that discussions have been held between the city of Burlington and Navy Reserve officials on the relocation of the Naval Reserve Center in Burlington, VT. These talks began shortly after the city launched an aggressive campaign to revitalize its waterfront along Lake Champlain. The Naval Reserve Center is located on waterfront property that was conveyed by the city. Since Navy personnel do not operate any vessels, the city feels the center could adequately operate in a different location. The Committee agrees the Navy Reserve could suitably carry out the mission elsewhere. However, it would require a building and location that meets the needs of the unit. To facilitate the relocation of the Burlington Naval Reserve Center, the Committee directs the Navy Reserve to prepare detailed design plans for a new building. These plans are to be completed no later than April 1, 1990, with copies provided to the House and Senate Appropriations Subcommittees on Military Construction.

Stead, NV.—The Committee has provided $984,000 in the "Army National Guard minor construction" account to fund phase II of the aviation support facility at Stead, NV. The Department is directed to proceed with this project immediately following enactment of the military construction act.

Kulis, AK.—The Committee understands that the Air National Guard will consolidate all elements of the 210th Air Search Rescue Squadron at Kulis Air National Guard base. The Committee endorses this initiative, and expects the request for additional facili-

ties programmed for Kulis to be included in the fiscal year 1991 request for facilities.

Utah National Guard.—The Committee is aware of the requirements for expanding the facilities and ramp space for the reorganization and modernization of the Army aviation units in Utah. Therefore, the Army National Guard is directed to initiate planning and design of the armory, the Army aviation support facility, the organizational maintenance shop and associated ramp space, and include these projects in the fiscal year 1991 budget request.

Additional increases.—The Department failed to comply with the requirement of the Congress to request funding in fiscal year 1990 for programs to upgrade Army National Guard indoor ranges and construct armory storage buildings. The Committee has included $10,000,000 for each of these programs.

Family Housing Overview

The Committee has provided $3,122,744,000 for family housing construction and operations and maintenance. The Committee believes that the services must place a high priority on providing adequate housing for military families.

Overseas housing.—The Committee has placed a moratorium on new family housing projects at most overseas locations. The Committee directs that a study be undertaken by the Department and submitted to the Committee by February 15, 1990, on plans for reducing the cost of providing family housing overseas. The Committee continues to believe that host nations should be urged to help defray the cost of family housing and community facilities.

The Committee has retained language which prevents an increase in accompanied tours in Korea. The Committee also reiterates its recommendation that the Department further reduce accompanied tours in Panama and the Philippines, due to security problems and the potential for a reduced United States military presence in the future.

Contract cleaning.—The budget request includes $30,000,000 to support the practice of contract cleaning of military family housing. The Committee has denied this request and has reduced funds in each account to reflect the Committee's action. The Committee believes such a program is excessive during times of severe budgetary austerity. The Committee will support reinstating this practice only if the Department reorients the program so that there is a documented net savings to the Treasury.

Improvements program.—The Committee has reduced overall funding for family housing improvements since the Department failed to implement a standardized program required in last year's Senate and conference reports. Instead, the Committee has provided each service the same level of funding approved by the Senate last year. The Committee will consider an increase in the improvements program once the Department develops a family housing improvements strategy which is equitable for all services.

Whole house improvements.—The Committee continues to be supportive, within budgetary guidelines, with the concept of whole house improvements to existing family housing units. The Committee believes that the concept provides a cost-effective way to mod-

ernize the inventory of older family housing. The whole house improvement requires that the unit be vacated for a one-time refurbishment. This is far superior to the piece-meal approach which in many instances is done while families are trying to live in a unit. The Committee understands that a family might, if an assignment is long enough, have various portions of their quarters under construction almost continually.

The Committee commends the Air Force for being a leader in the whole house improvement concept. The Committee believes that the Army, Navy, and defense agencies are not doing enough in this area. The Committee directs that beginning in fiscal year 1992 whole house improvements will be given priority for funding. The Committee will listen carefully during hearings on the fiscal year 1991 budget request to input from the Department with regard to this initiative.

Utility costs.—The Committee reiterates the view that the Department should take specific action to reduce the cost of utility service. The Department was unresponsive to the Committee's direction that action be taken during fiscal year 1989. The Committee directs the Department to implement a test program of metering family housing units to acquire a more accurate data base on energy consumption and to develop proposals to reduce energy consumption. The Committee also recommends the utility usage test program include methods of reducing energy consumption in barracks, industrial facilities, administrative buildings, et cetera. The General Accounting Office has informed the Committee that energy consumption at certain military bases far exceeds the consumption of families and industry in local communities. If the Department fails to take action during fiscal year 1990, to implement a more realistic energy usage policy, the Committee will consider unilateral reductions in the amount of funds available for utility payments.

General officers quarters.—The Committee has denied funding for all projects providing construction of new general officers quarters which exceed the current statutory limit on square feet. The Committee will consider a reprogramming for these projects if they are reduced in scope to comply with the statutory limitation on space available for general officers. The Committee also requires that all existing thresholds and reporting requirements currently in effect for general officer quarters shall remain in effect in fiscal year 1990. In addition, the Committee has fenced funds provided for Navy family housing improvements and maintenance and repair to general officer quarters until the Department halts the practice of utilizing operations and maintenance funds to supplement projects at historic locations. The Committee will not lift the fence until the Department has provided the Committee with a written report indicating that the practice has been halted.

Leasing.—The Committee agrees with House report language concerning leasing of family housing. The Committee believes the Department should continue to explore such new initiatives as the installment purchase of family housing for new construction. In the view of the Committee, ownership is far superior to long-term lease programs for new family housing. The Committee also agrees with House report language on lease reporting requirements.

Family housing, minor projects.—The Committee has not funded requested projects under $1,000,000 for family housing offices, warehouses, and maintenance facilities. The services may utilize family housing improvements funds to execute these minor projects.

FAMILY HOUSING, ARMY

Appropriations, 1989	$1,527,231,000
Budget estimate, 1990	1,437,900,000
House allowance	1,524,110,000
Committee recommendation	1,459,771,000

The Committee recommends $1,459,771,000 for family housing, Army in fiscal year 1990 including $300,000 applied to debt reduction. This is $21,571,000 above the budget request. Specific details are included in the tables at the end of the report.

NEW CONSTRUCTION

The Committee has approved funding for new construction totaling $91,171,000 as listed below:

New construction:	
Hawaii:	
Helemano: 90 units	$10,322,000
Hickham: 20 units	2,500,000
Kaneohe: 40 units	4,700,000
Construction improvements	72,300,000
Planning	1,349,000

OPERATION, MAINTENANCE, AND LEASING AND DEBT PAYMENT

The Committee has provided $1,368,600,000 for operating expenses, maintenance, leasing, and debt reduction, a reduction of $14,400,000 from the budget estimate

Government Rental Housing Program.—The Committee has approved the Army's request to initiate a Government Rental Housing Program [GRHP] in Germany. Under this program, the U.S. Government leases houses directly from a local landlord. In return a soldier living in the leased quarters forfeits all housing allowances. The Committee has approved this program although it is concerned that the program may not be as successful or cost effective as the Army has testified. However, the program is supported in fiscal year 1990 because the Committee believes that such a leasing program in Europe may be preferable to construction of new family housing until specific overseas base closures as a result of arms control talks are known. The Committee directs the Department to provide a report by March 15, 1990, on the status of the program. Continued support of the program will be contingent on the Army proving that the GRHP program is more cost effective that other options for providing family housing in Europe.

Yuma Proving Ground, AZ.—The Committee directs the Department to conduct a study of available base housing and future housing needs at the Yuma Proving Ground, AZ. The study should take into account new activities that could be programmed at Yuma Proving Ground in the future. The Department is directed to provide the report to the Committee by March 15, 1990.

FAMILY HOUSING, NAVY

Appropriations, 1989	$799,041,000
Budget estimate, 1990	752,200,000
House allowance	918,585,000
Committee recommendation	742,073,000

The Committee recommends $742,073,000 for family housing, Navy in fiscal year 1990 which is $10,127,000 below the budget request. Specific details are included in the tables at the end of the report.

NEW CONSTRUCTION

The Committee has approved funding for new construction totaling $123,873,000 as listed below:

New construction:	
California:	
Camp Pendleton: 112 units	$10,150,000
San Francisco: 344 units	28,350,000
Illinois: Glenview: 140 units	15,300,000
Maryland: Thurmont: 11 units	1,160,000
Iceland: Keflavik: 112 units	22,913,000
Construction improvements	45,000,000
Planning	1,000,000

Newport Naval Education and Training Center, RI.—The Committee has approved $13,700,000 for improvements to 220 family housing units at the Newport Naval Education and Training Center, RI, as authorized by the Senate-passed national defense authorization bill.

Iceland.—None of the funds appropriated for family housing in Iceland may be obligated until the Department provides the Committee with a certification that the most cost effective option for providing new construction in that country has been approved by the host nation.

OPERATION, MAINTENANCE, AND LEASING

The Committee has provided $618,200,000 for operating expenses, maintenance, and leasing, a reduction of $6,600,000 from the budget request.

FAMILY HOUSING, AIR FORCE

Appropriations, 1989	$910,885,000
Budget estimate, 1990	1,015,900,000
House allowance	1,026,035,000
Committee recommendation	894,800,000

The Committee recommends $894,800,000 for family housing, Air Force in fiscal year 1990 which is $121,100,000 below the budget request. Specific details are included in the tables at the end of the report.

NEW CONSTRUCTION

The Committee has approved funding new construction totaling $129,000,000 of family housing units for the Air Force as follows:

Construction improvements	$125,000,000
Planning	4,000,000

OPERATION, MAINTENANCE, AND LEASING

The Committee has provided $765,800,000 for operating expenses, maintenance, and leasing, a reduction of $9,000,000 from the budget request.

Family Housing, Defense Agencies

Appropriations, 1989	$20,700,000
Budget estimate, 1990	21,300,000
House allowance	21,300,000
Committee recommendation	21,300,000

The Committee recommends $21,300,000 for family housing, defense agencies in fiscal year 1990, the same as the budget request and the House. Specific details are included in the tables at the end of the report.

CONSTRUCTION

The Committee has approved $400,000 for the construction of new housing at a classified location and has provided $200,000 for construction improvements.

OPERATIONS, MAINTENANCE, AND LEASING

The Committee has provided $20,700,000 for these accounts, the same as the budget request.

Homeowners Assistance Fund

Appropriations, 1989	$2,000,000
Budget estimate, 1990	5,100,000
House allowance	5,100,000
Committee recommendation	5,100,000

The Committee recommends $5,100,000 to be appropriated for the Homeowners Assistance Fund, the same as the budget request.

GENERAL PROVISIONS

The Committee has made no changes to sections 101–121 as recommended by the House. Other changes are as follows:

Section 122. This section has been deleted by the Committee.

Sections 122–126. These sections have been renumbered to correspond to deletion of section 122.

COMMITTEE RECOMMENDED PROVISIONS

The Committee has added two general provisions to the House-passed bill as follows:

Section 126. The Committee has included this provision which provides authority for the Secretary of the Army to convey lands at the Kapalama Military Reservation, HI, to the State of Hawaii. The text of the provision is as follows:

> *SEC. 126. (a) Notwithstanding any other provision of law and subject to subsections (b) through (d), the Secretary of the Army (hereinafter the Secretary) shall convey directly to the State of Hawaii without consideration all right, title, and interests in and to approximately 17.8 acres of ceded lands at Kapalama Military Reservation, Hawaii.*
>
> *(b) Excepting improvements which were installed at the State's own expense, the conveyance authorized under subsection (a) is conditioned upon payment by the State of Hawaii to the United States of the fair market value, as determined by the Secretary, of any improvements on the land authorized to be conveyed under subsection (a).*
>
> *(c) The exact acreage and legal description of the land to be conveyed under subsection (a) shall be determined by a survey which is satisfactory to the Secretary. The cost of such survey shall be borne by the State of Hawaii.*
>
> *(d) The Secretary may require such additional terms and conditions under this section as the Secretary considers appropriate to protect the interests of the United States.*

Section 127. The Committee has included this provision which allows the Secretary of the Navy to negotiate with the State of Hawaii to exchange the 108-acre Navy Manana storage area for construction of a causeway to Ford Island plus certain facility replacements. This concept was endorsed in the conference report in the Fiscal Year 1989 Military Construction Appropriation Act. The section further provides for Navy competitive sale of an adjacent 14-acre property to accomplish other facility replacements related to the construction of the causeway thereby enabling the combining and relocation of certain tenant activities from both properties. These transactions will provide significant benefits to the Navy at no additional cost. This project recognizes that development at

mainside Pearl Harbor is at the saturation point. A causeway linking the Ford Island's sparsely developed 450 acres to the mainside will provide much needed development opportunities for the naval base. The text of the provision is as follows:

SEC. 127. (a) SALE OF LANDS.—Notwithstanding any other provision of law, and subject to subsections (b) through (h), the Secretary of the Navy (hereinafter the "Secretary") may sell the following real property together with improvements thereon:

(1) Approximately 108 acres in Pearl City, Oahu, Hawaii, known as the Manana Storage Area; and

(2) Approximately 14 acres in Pearl City, Oahu, Hawaii, known as Pearl City Junction.

(b) CONDITIONS OF SALE:

(1) MANANA STORAGE AREA.—The State of Hawaii shall have the right to acquire and the Secretary shall have the authority to sell to the State of Hawaii this property by meeting the terms and conditions set forth in subsection (c);

(2) PEARL CITY JUNCTION.—The Secretary shall have the authority to sell this property through competitive procedures;

(3) Consideration for each sale shall not be less than the fair market value of the property, as determined by the Secretary; and

(4) Payment may be by cash or as specified in subsections (c) and (d), as determined by the Secretary.

(c) SALE OF MANANA STORAGE AREA:

(1) As consideration for any transfer to the State of Hawaii of the Manana Storage Area, the State must:

(a) At a site or sites to be determined by the Secretary, design and construct to the Secretary's specifications and satisfaction: (1) an openable causeway from mainside Pearl Harbor Naval Base to Ford Island; and (2) replacement facilities for those Navy facilities presently on Manana Storage Area; and actually relocate, to the satisfaction of the Secretary, the functions presently on Manana Storage Area; or

(b) Provide funds to allow the Secretary to perform the design, construction and relocation specified in subsection c(1)(a); or

(c) Provide any combination of the consideration enumerated in subsections c(1)(a) and c(1)(b) above that accomplishes the design, construction, and relocation, at the discretion of, and to the satisfaction of, the Secretary.

(2) If the State of Hawaii constructs the causeway or replacement facilities or any portion thereof, upon the acceptance by Secretary, the State shall transfer complete title to those facilities to the Secretary free of any liens or encumbrances.

(d) SALE OF PEARL CITY JUNCTION.—As consideration for the sale of Pearl City Junction, the Navy shall receive either funds, or actual design and construction of facilities plus relocation, or a combination thereof, as determined by the Secretary, to accommodate consolidation and relocation of the functions on the sale property to other Navy and Marine Corps property. This may include:

(1) Relocation and consolidation of functions at Manana Storage Area and Pearl City Junction to common replacement facilities and;

(2) Relocation of Marine Corps functions that would be displaced by such consolidation to replacement facilities to be designed and constructed at Marine Corps Air Station, Kaneohe Bay.

(e) USE OF FUNDS:

(1) The Secretary may use the funds derived from any sale of land under this section to accomplish any of the purposes described in subsections (c) and (d) including any related expenses;

(2) Funds received from the sales of lands under this section may be placed in an interest bearing account by the Secretary until expended and the accrued interest therefrom may be used in the same manner as the sale proceeds; and

(3) Any funds which are unexpended after all the actions described in subsections (c) and (d) have been accomplished, shall be available for design and construction of additional support facilities for Naval Supply Center, Pearl Harbor.

(f) LEGAL DESCRIPTIONS OF LANDS.—The exact acreages and legal descriptions of the properties to be transferred to the State of Hawaii or sold under this section shall be in accordance with surveys that are satisfactory to the Secretary.

(g) NOTIFICATION.—The Secretary may not enter into any contract under this section to:

(1) Convey title to real property;

(2) Provide for design or construction of a causeway to Ford Island, replacement facilities or other support facilities; and

(3) Provide for relocation of functions from the properties to be sold until:

(a) The Secretary has transmitted to the Appropriations Committees of the Senate and House of Representatives a report of the details of the proposed transaction; and

(b) A period of 21 days has expired from the date such report has been received by the Committees.

(h) ADDITIONAL TERMS.—The Secretary may require such additional terms and conditions in agreements entered into under this section as the Secretary considers appropriate to protect the interests of the United States.

COMPLIANCE WITH PARAGRAPH 7, RULE XVI, OF THE STANDING RULES OF THE SENATE

Paragraph 7 of rule XVI requires that Committee reports on general appropriations bills identify each Committee amendment to the House bill "which proposes an item of appropriation which is not made to carry out the provisions of an existing law, a treaty stipulation, or an act or resolution previously passed by the Senate during that session."

All projects for which appropriations are provided by the Committee are unauthorized. The National Defense Authorization Act for Fiscal Year 1990 is now pending in House-Senate conference.

COMPLIANCE WITH PARAGRAPH 12, RULE XXVI OF THE STANDING RULES OF THE SENATE

Paragraph 12 of rule XXVI requires that Committee reports on a bill or joint resolution repealing or amending any statute or part of any statute include "(a) the text of the statute or part thereof which is proposed to be repealed; and (b) a comparative print of that part of the bill or joint resolution making the amendment and of the statute or part thereof proposed to be amended, showing by stricken-through type and italics, parallel columns, or other appropriate typographical devices the omissions and insertions which would be made by the bill or joint resolution if enacted in the form recommended by the committee."

In compliance with this rule, changes in existing law proposed to be made by the bill are shown as follows: existing law to be omitted is enclosed in black brackets; new matter is printed in italic; and existing law in which no change is proposed is shown in roman.

No change in existing statutes has been proposed.
